

Capstone Seminar

Lecturers: Prof. Tamar Almor/ Ms. Lilach Danewitz

T.A.: Ms. Dorian Mor / Mr. James Sadovsky

Team Assignment #3: Financial plan / Business model & POC

Paper submission & Class presentation

Due: April 20th (Monday group) 23rd (Thursday group), 2026,
to be submitted before the class starts and presented in class.

This assignment allows you to dive into your business model and financial plan and incorporate it with your MVP findings.

**The paper should be no longer than 3 pages, not including the appendices.
Presentation should be no longer than 6 minutes.**

Plan your business model and financial plan based on your MVP, as follows:

Determine and present your **venture's business model**, what are its basic assumptions?

What will you create/manufacture/produce? What will you outsource? What are your competitive capabilities?

Determine the **revenue model** of your venture. Think about:

- A. The growth of the industry and the development of the market segment that you identified (TAM SAM SOM). Focus on the data you have regarding your SOM.
- B. How your venture will make money, who will pay, and what will they pay for.
- C. What pricing strategies will you use (i.e. cost plus, perceived value, industry average).
- D. Plan your next fundable point and what are the KPI's you must reach in order to get an investment (revenues / customers / partners / team / technology / etc.)

Based on the above preparation please submit the following deliverables:

1. Describe in short (maximum 1 paragraph) **the POC** you have built for your venture and why you chose this specific type of POC.
2. Create your **financial plan** describing your venture's main KPI's and related costs. Make sure to connect the venture's main KPI's and related costs to your financial plan.
 - a. **A pro-forma P&L statement**, which presents forecasts for the next 4 quarters of the first year and after that for the next four years (total of five years).
 - b. **The expected break-even point.**

To create this financial plan, understand your basic assumptions regarding growth of the venture, its SOM and its costs. What are they based on? Add the plan and your assumptions as an appendix. You may use an excel spreadsheet discussed in class as a reference.

3. The investment you are seeking.

- a. What are the next steps planned to advance your venture.
 - What would you choose as your next MVP? What are your costs? How much money do you need? Please detail and explain your calculations.
 - How will you use the money? Define measurable KPIs. These should be tightly connected to your next fundable point as determined by you.
 - Identify resources you can use prior to asking for external funding (such as Amazon credits, IDC resources, 'barter', collaboration with other companies to use their platforms in a win- win situation, etc.).
 - Demonstrate how the above resources advance your venture.

Please include in the appendix:

- Any research materials you employed to reach your conclusions, including those regarding the development of TAM SAM SOM.
- Your financial plan.
- Your POC.
- a list of the GenAI tool(s) you used and screenshots of the prompts you used.

In class presentation Instructions:

1. Start with a one-liner (the venture name, problem you solve, for whom, how) and present your team. Define the venture: the need, the solution.
2. Present your POC.
3. Present how you would make money; and what the financial prospects are of your business, based on your business-financial model. When will you break even?
4. Present your revenue streams and cost structure.
5. What are your next steps for developing your venture? What investment are you seeking and for what purpose – please be exact.
